Kind of injury, disease or death

 - (b) For the purposes of this Statement of Principles, "**Huntington's chorea**" means a genetic disorder of the brain, heritable as an autosomal dominant trait, which is characterised by progressive degeneration of nerve cells in the basal ganglia and cortex, leading to motor, emotional and cognitive dysfunction.

 - (d) In the application of this Statement of Principles, the definition of "**Huntington's chorea**" is that given at paragraph 3(b) above.

Basis for determining the factors

4. After examining the available sound medical-scientific evidence the Repatriation Medical Authority is of the view that it is more probable than not on the sound medical-scientific evidence available, that the only factor that can be related to the cause of or material contribution to or aggravation of **Huntington's chorea** or **death from Huntington's chorea** and which can be related to relevant service rendered by veterans or members of the Forces under the VEA, or members under the *Military Rehabilitation and Compensation Act 2004* (the MRCA) is that set out in clause 5.

Factors that must be related to service

5. The factor that must exist before it can be said that, on the balance of probabilities, in relation to the circumstances of a person's relevant service causing or materially contributing to or aggravating **Huntington's chorea** or **death from Huntington's chorea** is inability to obtain appropriate clinical management for Huntington's chorea.
