Statement of Principles concerning

GIANT CELL ARTERITIS

No. 72 of 2012

for the purposes of the

Veterans' Entitlements Act 1986
and

Military Rehabilitation and Compensation Act 2004

Title

1. This Instrument may be cited as Statement of Principles concerning giant cell arteritis No. 72 of 2012.

Determination

2. The Repatriation Medical Authority under subsection **196B(3)** and **(8)** of the *Veterans' Entitlements Act 1986* (the VEA):
 - (a) revokes Instrument No. 72 of 2001 concerning giant cell arteritis; and
 - (b) determines in its place this Statement of Principles.

Kind of injury, disease or death

3.
 - (a) This Statement of Principles is about **giant cell arteritis** and **death from giant cell arteritis**.
 - (b) For the purposes of this Statement of Principles, "**giant cell arteritis**" means a systemic, inflammatory, vascular syndrome of the large and medium-sized arteries that predominantly affects the temporal arteries. It is also known as temporal arteritis, cranial arteritis or Horton's disease or syndrome.
 - (c) Giant cell arteritis attracts ICD-10-AM code M31.5 or M31.6.
 - (d) In the application of this Statement of Principles, the definition of "**giant cell arteritis**" is that given at paragraph 3(b) above.

Basis for determining the factors

4. On the sound medical-scientific evidence available, the Repatriation Medical Authority is of the view that it is more probable than not that **giant cell arteritis** and **death from giant cell arteritis** can be related to relevant service rendered by veterans or members of the Forces under the VEA, or members under the *Military Rehabilitation and Compensation Act 2004* (the MRCA).

Factors that must be related to service

5. Subject to clause 7, at least one of the factors set out in clause 6 must be related to the relevant service rendered by the person.

Factors

6. The factor that must exist before it can be said that, on the balance of probabilities, **giant cell arteritis** or **death from giant cell arteritis** is connected with the circumstances of a person's relevant service is:
 - (a) smoking at least 20 pack-years of cigarettes, or the equivalent thereof in other tobacco products, before the clinical onset of giant cell arteritis, and where smoking has ceased, the clinical onset of giant cell arteritis has occurred within 30 years of cessation; or
 - (b) smoking at least 20 pack-years of cigarettes, or the equivalent thereof in other tobacco products, before the clinical worsening of giant cell arteritis, and where smoking has ceased, the clinical worsening of giant cell arteritis has occurred within 30 years of cessation; or
 - (c) inability to obtain appropriate clinical management for giant cell arteritis.

Factors that apply only to material contribution or aggravation

7. Paragraphs **6(b)** and **6(c)** apply only to material contribution to, or aggravation of, giant cell arteritis where the person's giant cell arteritis was suffered or contracted before or during (but not arising out of) the person's relevant service.

Inclusion of Statements of Principles

8. In this Statement of Principles if a relevant factor applies and that factor includes an injury or disease in respect of which there is a Statement of Principles then the factors in that last mentioned Statement of Principles apply in accordance with the terms of that Statement of Principles as in force from time to time.

Other definitions

9. For the purposes of this Statement of Principles:

"death from giant cell arteritis" in relation to a person includes death from a terminal event or condition that was contributed to by the person's giant cell arteritis;

"ICD-10-AM code" means a number assigned to a particular kind of injury or disease in The International Statistical Classification of Diseases and Related Health Problems, 10th Revision, Australian Modification (ICD-10-AM), Seventh Edition, effective date of 1 July 2010, copyrighted by the National Centre for Classification in Health, Sydney, NSW, and having ISBN 978 1 74210 154 5;

"pack-years of cigarettes, or the equivalent thereof in other tobacco products" means a calculation of consumption where one pack-year of cigarettes equals twenty tailor-made cigarettes per day for a period of one calendar year, or 7300 cigarettes. One tailor-made cigarette approximates one gram of tobacco or one gram of cigar or pipe tobacco by weight. One pack-year of tailor-made cigarettes equates to 7.3 kilograms of smoking tobacco by weight. Tobacco products means either cigarettes, pipe tobacco or cigars, smoked alone or in any combination;

"relevant service" means:

- (a) eligible war service (other than operational service) under the VEA;
- (b) defence service (other than hazardous service and British nuclear test defence service) under the VEA; or
- (c) peacetime service under the MRCA;

"terminal event" means the proximate or ultimate cause of death and includes:

- (a) pneumonia;
- (b) respiratory failure;
- (c) cardiac arrest;
- (d) circulatory failure; or
- (e) cessation of brain function.

Application

- 10.** This Instrument applies to all matters to which section 120B of the VEA or section 339 of the MRCA applies.

Date of effect

- 11.** This Instrument takes effect from 31 October 2012.

Dated this *twenty-second* day of *October* 2012
