

Statement of Principles  
concerning

**RAPIDLY PROGRESSIVE CRESCENTIC  
GLOMERULONEPHRITIS**

**No. 81 of 2010**

for the purposes of the

*Veterans' Entitlements Act 1986*  
and  
*Military Rehabilitation and Compensation Act 2004*

**Title**

1. This Instrument may be cited as Statement of Principles concerning rapidly progressive crescentic glomerulonephritis No. 81 of 2010.

**Determination**

2. This Statement of Principles is determined by the Repatriation Medical Authority under subsection **196B(2)** of the *Veterans' Entitlements Act 1986* (the VEA).

**Kind of injury, disease or death**

3. (a) This Statement of Principles is about **rapidly progressive crescentic glomerulonephritis** and **death from rapidly progressive crescentic glomerulonephritis**.  
(b) For the purposes of this Statement of Principles, "**rapidly progressive crescentic glomerulonephritis**" means a form of glomerulonephritis characterised by the presence of extensive cellular crescents on histopathology and a rapid decline in renal function over a period of weeks to months.

**Basis for determining the factors**

4. The Repatriation Medical Authority is of the view that there is sound medical-scientific evidence that indicates that **rapidly progressive crescentic glomerulonephritis** and **death from rapidly progressive**

**crescentic glomerulonephritis** can be related to relevant service rendered by veterans, members of Peacekeeping Forces, or members of the Forces under the VEA, or members under the *Military Rehabilitation and Compensation Act 2004* (the MRCA).

### **Factors that must be related to service**

5. Subject to clause 7, at least one of the factors set out in clause 6 must be related to the relevant service rendered by the person.

### **Factors**

6. The factor that must as a minimum exist before it can be said that a reasonable hypothesis has been raised connecting **rapidly progressive crescentic glomerulonephritis** or **death from rapidly progressive crescentic glomerulonephritis** with the circumstances of a person's relevant service is:
  - (a) having a specified infection within the two months before the clinical onset of rapidly progressive crescentic glomerulonephritis; or
  - (b) having a specified immune or autoimmune disorder at the time of the clinical onset of rapidly progressive crescentic glomerulonephritis; or
  - (c) having a malignant neoplasm at the time of the clinical onset of rapidly progressive crescentic glomerulonephritis; or
  - (d) taking a specified drug within the one week before the clinical onset of rapidly progressive crescentic glomerulonephritis; or
  - (e) having at least three episodes of acute volatile substance intoxication within the one month before the clinical onset of rapidly progressive crescentic glomerulonephritis; or
  - (f) inhaling or absorbing organic solvents for at least one hour per week for the three months before the clinical onset of rapidly progressive crescentic glomerulonephritis; or
  - (g) inability to obtain appropriate clinical management for rapidly progressive crescentic glomerulonephritis.

### **Factors that apply only to material contribution or aggravation**

7. Paragraph 6(g) applies only to material contribution to, or aggravation of, rapidly progressive crescentic glomerulonephritis where the person's

rapidly progressive crescentic glomerulonephritis was suffered or contracted before or during (but not arising out of) the person's relevant service.

### **Inclusion of Statements of Principles**

8. In this Statement of Principles if a relevant factor applies and that factor includes an injury or disease in respect of which there is a Statement of Principles then the factors in that last mentioned Statement of Principles apply in accordance with the terms of that Statement of Principles as in force from time to time.

### **Other definitions**

9. For the purposes of this Statement of Principles:

**"a specified drug"** means:

- (a) allopurinol;
- (b) D-penicillamine;
- (c) hydralazine;
- (d) piperacillin;
- (e) propylthiouracil; or
- (f) rifampicin;

**"a specified immune or autoimmune disorder"** means:

- (a) antiphospholipid syndrome;
- (b) Behcet's disease;
- (c) Churg-Strauss syndrome;
- (d) cryoglobulinaemia;
- (e) Goodpasture's disease;
- (f) Henoch-Schonlein purpura;
- (g) inflammatory bowel disease;
- (h) microscopic polyangiitis;
- (i) mixed connective tissue disease;
- (j) relapsing polychondritis;
- (k) rheumatoid arthritis;
- (l) sarcoidosis;
- (m) Sjogren's syndrome;
- (n) systemic sclerosis;
- (o) systemic lupus erythematosus; or
- (p) Wegener's granulomatosis;

**"a specified infection"** means a bacterial infection or an infection with hepatitis B virus, hepatitis C virus, or human immunodeficiency virus;

**"acute volatile substance intoxication"** means reversible, clinically significant, maladaptive behavioural or psychological changes (e.g., belligerence, assaultiveness, apathy, impaired judgement, impaired social or occupational functioning) occurring during or shortly after the intentional use of, or short-term high-dose exposure to, a volatile substance, and which is accompanied by two or more of the following signs:

- (a) dizziness;
- (b) nystagmus;
- (c) incoordination;
- (d) slurred speech;
- (e) unsteady gait;
- (f) lethargy;
- (g) depressed reflexes;
- (h) psychomotor retardation;
- (i) tremor;
- (j) generalised muscle weakness;
- (k) blurred vision or diplopia;
- (l) stupor or coma; or
- (m) euphoria;

where the symptoms are not due to a general medical condition and are not better accounted for by another mental disorder;

**"death from rapidly progressive crescentic glomerulonephritis"** in relation to a person includes death from a terminal event or condition that was contributed to by the person's rapidly progressive crescentic glomerulonephritis;

**"organic solvents"** means oxygenated, aliphatic or aromatic solvents;

**"relevant service"** means:

- (a) operational service under the VEA;
- (b) peacekeeping service under the VEA;
- (c) hazardous service under the VEA;
- (d) warlike service under the MRCA; or
- (e) non-warlike service under the MRCA;

**"terminal event"** means the proximate or ultimate cause of death and includes:

- (a) pneumonia;
- (b) respiratory failure;
- (c) cardiac arrest;
- (d) circulatory failure; or
- (e) cessation of brain function.

**Date of effect**

**10.** This Instrument takes effect from 1 September 2010.

Dated this **eighteenth** day of  
**August** 2010

The Common Seal of the )  
Repatriation Medical Authority )  
was affixed to this instrument )
